

Verizon 5G Business Internet

FAST. RELIABLE. SCALABLE.

Blazing a new pathway to Business Innovation with connectivity for companies both large and small.

5G

- Maximum 5G Bandwidth: 100Mbps download/25Mbps upload
- Unlimited data allowance (no overage charges)
- Automatic failover to 4G LTE if 5G is not available
- Requires 5G C-band availability and 5G C-band certified equipment
- Must be used with Telesystem approved managed products

Fueled by 5G C-band, Verizon 5G Business Internet enables next-level customer experiences and gives organizations the performance they need to excel. With low latency, fast speed and agile connectivity, you can obtain a fast connection wherever you are. In addition to virtually unlimited data, this leading-edge, fixed wireless access solution paves the way for innovation, to help your business stay competitive.

Benefits of Verizon 5G Business Internet:

Speed and Performance

Enhanced 100Mbps speed tier features no data limits or throttling, which provides optimal connectivity for businesses and a better experience for remote workers, without worrying about overages.

Innovation Ready

Connect to the internet with improved efficiency as a primary or a redundant connection. Utilizing Verizon's Ultra-Wideband network, you can take advantage of 5G speeds, unlimited capacity, reduced jitter for video streaming, and preparation for next-generation network use.

Failover Solution

In the event of a power outage or inability to access 5G, Verizon 5G Business Internet will automatically provide access to the 4G LTE network, allowing for continued support of data traffic until 5G connection is available again.

Backup internet and failover solutions are best for:

- Healthcare, manufacturing or industries requiring reliable connectivity for critical applications.
- Organizations that need high-speed internet for new stores, branches or worksites.
- First responders, those in remote areas, and others seeking to stay connected in adverse conditions.

Utilizing 5G Business Internet

This plan is available on C-band only and requires C-band certified equipment and 5G sims.

This service is only certified for use with Telesystem managed products. Certified devices include the CradlePoint W1850.
