

Introduction

The Yealink CP965 Conference Phone Supports up to 2 CPW65 DECT Microphones. Manufacturer specifications indicate a 20m range. As the name suggests these are Microphones only and do not include a speaker for ease of hearing at range. To use the Yealink CPW65 your CP965 device must be on Firmware version 143.86.0.10 at a minimum.

Pairing Process

1. From the Home Screen Press the More button

2. Then press MIC.

3. Then press the Pairing Button on the CP965

4. The CP965 Conference Phone will then enter pairing mode.

- 5. Next, do a long press and hold of the **Mute** button on the CPW65 Expansion Microphone until the light begins to rapidly flash yellow.
- 6. After about 10-15 seconds of flashing the devices should be in sync.

Microphone Unbinding

- 1. The Unbinding process should be utilized if you need to replace a microphone or have a scenario with multiple bases sharing microphones near each other.
- 2. Utilize the **Find** feature outlined below if you are unsure which microphone is which.
- 3. Tap **Details** on the Microphone you wish to remove.

4. This page includes a variety of information about the selected microphone.

5. The **unbind** button is found at the bottom of **Details**.

<	MIC	
Connect status: Connected		
MIC Model: CPW65		
Firmware Version: 15.0.0.10		
MICPOD IPEI: 030af44534		
Battery: 80 %		
Standby time: 228Hour0min		
Work Time: 10Hour21min		
	Unbind	

6. Selecting Unbind presents you with a prompt to confirm you wish to unbind that microphone.

7. Press **OK** and the microphone will become unbound allowing you to perform the pairing process on a new microphone if required.

Microphone Find Feature

This allows a user to visually determine which Microphone is MIC1 and which is MIC2 due to the flashing green/red Mute button.
