

Yealink T42G, T42S & T43U Phones

Quick Reference Guide

Blue Platform

Available features may vary. Particular feature set is based on the original order and the system administrator's requests for each deployment. Please contact your system administrator or Telesystem directly to discuss any additions to the system.

Programmable Top Keys: Two line keys and 15 other buttons may be programmed for features such as Park, Page, etc.

Message Waiting Indicator (Voicemail)

Soft keys: four state-based keys that line the bottom of the screen. Available options will change based on whether phone is in use or idle.

Call Handling Basics

Answer a call

Lift the handset then begin speaking to the caller.

Place a call

Lift the handset then enter the phone number, extension, or code you wish to dial. Press Send to initiate the call or wait for it to go through.

End a call

Hang up the handset or press the End Call soft key.

Mute

Press the mute  button to mute your audio while on a call. Press again to disengage.

Speaker

Press the speaker  button to use speaker audio mode.

Headset

Press the headset  button to use headset mode audio (must have a headset attached).

Volume

Press the volume  buttons to adjust volume for your ringer when idle or audio mode while on a live call.

Hold

Press the Hold soft key to place an active call on hold.

To resume a call:

- When only one is on hold, press the Resume soft key.
- When there is more than one on hold, use the  and  buttons to select the desired call then press the Resume soft key.

Advanced Call Handling

Blind Transfer (Unannounced)

Blind transfers pass through the caller ID of the originating caller to the third party.

- Press the Tran soft key to place the first call on hold
- Input the destination extension or phone number
- Press the Tran soft key to complete the transfer

Transfer directly to an internal **voicemail** box by dialing 7 plus the extension as the destination number

Announced Transfer

- Press the Tran soft key to place the first call on hold
- Input the destination extension or phone number. Remain on the line while the second call connects.
 - To complete the transfer after speaking with the third party, hang up or press the Tran soft key.
 - To cancel the transfer and go back to the first party, press the Cancel or EndCall soft key. Your first call will still be on hold.

Quick Reference Guide

Green Platform

Conference (Three Way) Call

- Press the Conf soft key to place first call on hold
- Input the third party's extension or phone number. Remain on the line while the second call connects.
- Press the Conf soft key to join the calls together.

While on a conference call, you can do the following:

- Hang up: this removes you from the conference and transfers the other two parties to each other.
- Manage: Press this soft key to remove a person from the conference or Mute one person in the conference (called "Far Mute").
- Split: Press this soft key to place both calls on hold on your phone separately.

Advanced Features

Redial

Press the redial  button to enter the Placed call list then use the  and  buttons to select the desired call. To place the selected call, either pick up the phone or press the Send soft key.

Voicemail

To access voicemail, press the Message  button. Follow the prompts to setup voicemail, listen to messages, or change greetings.

If messages are being sent to the phone, the message waiting indicator light will blink to signal a new message has been received.

History

Press the History soft key to access a list of the most recent calls. Use the  and  buttons to navigate the lists of all, missed, placed, received, and forwarded calls.

Do Not Disturb

Press the DND soft key then follow the screen prompts to turn do not disturb on or off. While enabled, all direct calls to your extension or direct phone number will go directly to your voicemail box. You may make outbound calls normally.

Park

Park is a 'shared' hold. A parked call can be seen and accessed by all desk phones at the site.

- To park a call, press one of the available Park keys. This transfers the call to that parking orbit and shows a lit light on the associated key.
- To retrieve a parked call, press the appropriate Park button.

Page

If enabled, the page feature broadcasts a spoken message through a group of phones, all phones, or overhead paging equipment.

- To send a page: tap the labeled Page key, speak the message, then hang up.

Call Forwarding

Call forwarding of your personal line/extension may be done from the phone.

- **To turn forwarding on:** Dial *72 followed by the extension or phone number to forward calls to. Pick up the phone to send the command.
- **To turn forwarding off:** Dial *73 then pick up the phone to send the command.

CommPortal Phone Applications

The Yealink T42G is a SIP phone which delivers many of its services by connecting to the CommPortal interface. This interface delivers several phone applications to its subscribers:

- Network Contacts (Directory)
- Hot Desking (Log Out/In)*
- Automatic Call Distribution (ACD)*

It is important to note that the use of these applications require a correct username and password for your phone account. These credentials may need to be entered when using an application.

The username and password are as follows:

- Username: direct dial phone number associated with your phone
- Password: current CommPortal (application) password

Please contact your system administrator or Telesystem if you do not know your direct dial phone number or password.

Network Contacts (Directory)

Press the Directory soft key to access the phone directory.

The Directory downloads all business group extensions, Multi Line Hunt Groups (MLHGs), and any CommPortal Contacts on your account.

Hot Desking (Log Out button)*

In some cases, not all employees are in the office at the same time, so these employees may 'share' physical phones, but each have individual account credentials. This is known as Hot Desking. Hot Desking allows employees to log in and out of a phone, thus taking their credentials with them to whatever desk they will be working at that particular day. Please note, [it's important to only be logged into one phone at a time.](#)

To log out of a phone:

- Press the Log Out key.
- The LCD screen will prompt you with a warning, "Are you sure you want to Log out?"
- Press the OK soft key to log out.
- The phone will reboot then show a logged out screen. No calls may be made until a user logs into the phone.

To log into a phone:

- Press the Login soft key.
- Enter the User Name and Password for the account (see previous note)
- Press the OK soft key
- The phone reboots and updates with the logged in user configuration

Green Platform

Automatic Call Distribution (ACD)*

If you are part of Multi Line Hunt Groups used for call center or other ring groups, your phone system administrator may have given you the right to log in and out of these groups using the ACD button.

To log in or out of a group:

- Press the ACD button.
- A list of all hunt groups for which you are a member will appear to the right of each, you will see whether you are Logged In or Logged Out. Select the group for which you want to change your status by using the  and  buttons.
- Press either the Login or LogOut soft key to change your login status for that group.

If you are a member of a true call center Multi Line Hunt Group (queue), your administrator may also ask that you manage your availability while you are logged in. This feature is called My State.

To change your availability for all Multi Line Hunt Group calls:

- After logging to a 1st one call center Multi Line Hunt Group, press the My State soft key.
- Use the  and  buttons to the status you wish to choose, then press the OK button to switch to that status.
- The current status will be reflected on the phone screen. The status applies only to calls through the Multi Line Hunt Groups.

Remember to change your availability to Available before logging out of all hunt groups.

The  icons indicate various ACD states as follows:

-  Logged Out
-  Logged In, Available
-  Logged In, Unavailable
-  Wrap Up

* Please note that these advanced features may initially need to be set up by the Telesystem team. Please contact Telesystem for more details.
