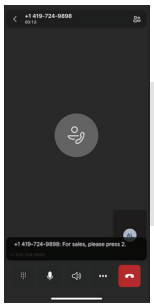
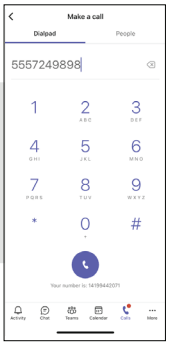
Remote work is here to stay, and Microsoft Teams is the platform of choice for many businesses. A significant evolution in communication technology, Telesystem's MS Teams Integration for UCaaS, allows users to make and receive calls with their existing hosted phone number on any MS Teams supported device including; desktop, mobile client, and MS Teams certified phones.

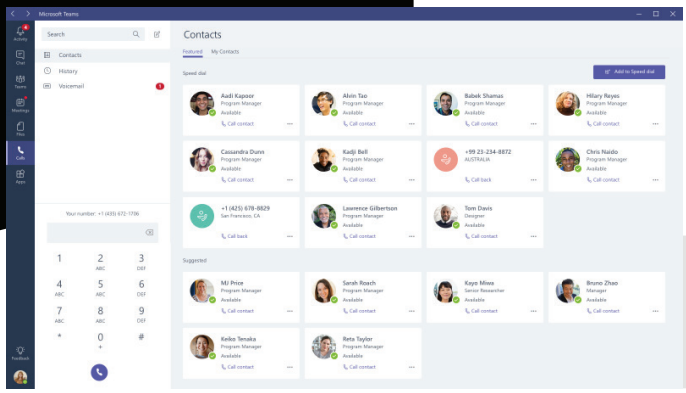
MS Teams Integration allows your Telesystem hosted phone system to seamlessly integrate with other critical communication tools used by your business.



Leverage Telesystem's Full-Featured Switch Platform to handle all calling scenarios that may not be covered by Microsoft's native calling platform.



Users can make and receive calls on MS Teams Desktop and Mobile Clients they are already familiar with, and MS Teams Certified Phones are also available.



Multiple packages are available to provide calling and meeting redundancies to ensure your business is always connected.
