

# Telesystem Secure Fax

SECURE. COMPLIANT. SIMPLE.

Email to fax has never been easier from a PC or phone. HIPAA compliance and SSL encryption offers peace of mind for your business.

## Eliminate Bulky Equipment

Send or receive documents with instant notifications after every transmission without the need for a fax machine. Utilize your desktop or laptop computer, smart phone, or tablet from the office or home, remote location or satellite office to send and receive secure faxes.

## Keep your documents on lockdown

Our robust data encryption process is trusted by healthcare, legal, real estate, and government professionals. Secure Fax is HIPAA and PHIPA compliant and meets industry standard security requirements.

## Compliant Faxing Made Simple.

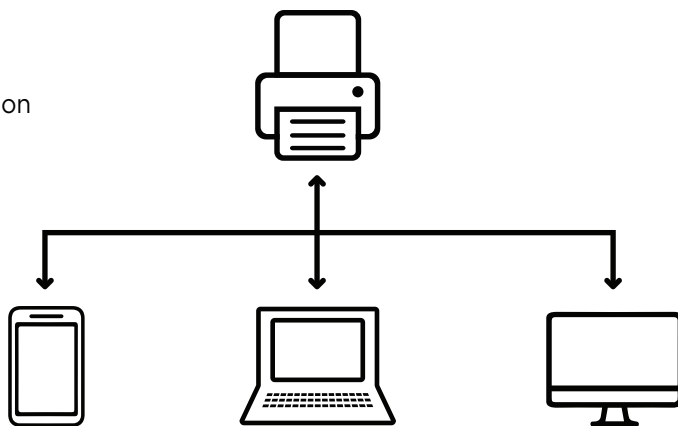

Security is no longer needed only in high-profile industries such as finance and medical fields- it is a necessity for every business. Telesystem Secure Fax simplifies and secures your dispersed workforce faxing needs and is compatible with any Windows, Mac OS X, Android, and iOS device.

### Secure Fax Features:
