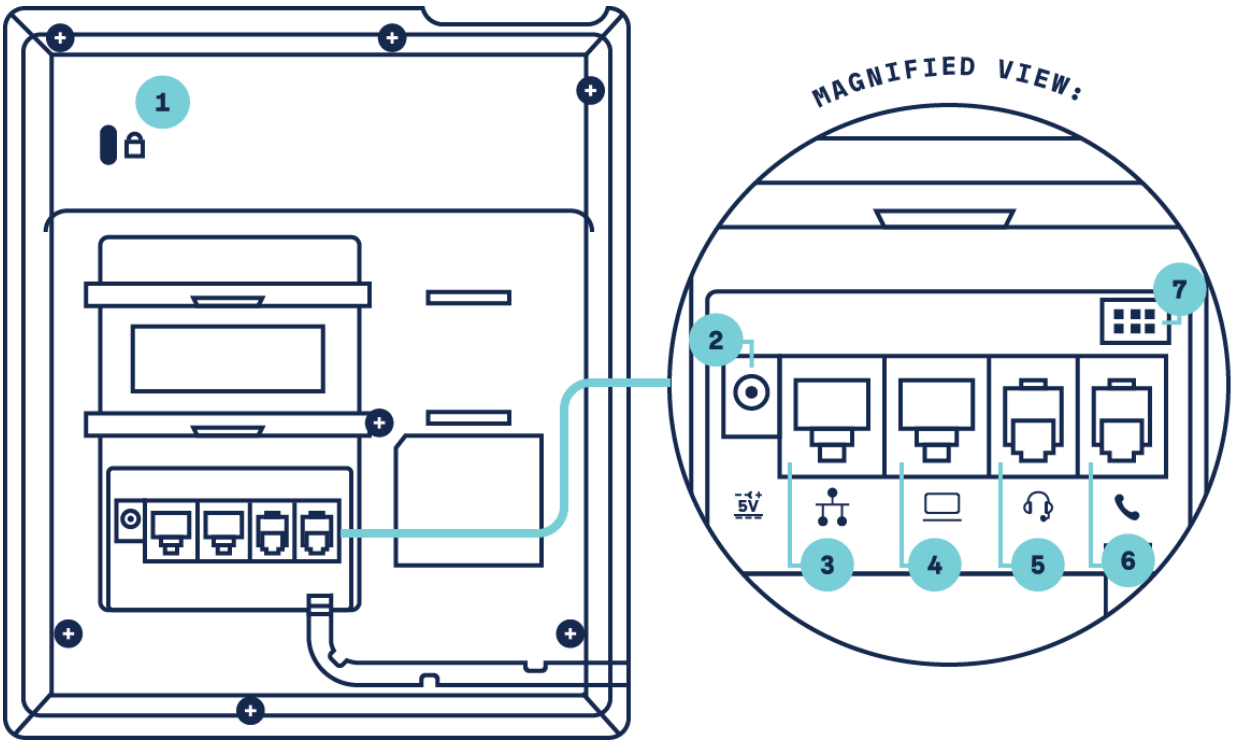
Standard VoIP Desk Phones
Connection Guide



1. Security Slot: Attach a universal security cable lock to fix your phone to a desktop

2. AC Power Connection: For power adapter, if Power over Ethernet (PoE) is unavailable

3. Ethernet Port: For wired Internet connection and PoE. May be labeled as “Internet” port.

4. Ethernet LAN Connection: Passthrough connectivity to your computer using this ethernet port. May be labeled as “PC” port.

5. RJ-9 Port: Most standard, wired headsets will connect using this port

6. Handset Port: Your handset will connect to the receiver base

7. EHS Port: Electronic hook-switch headsets will connect here

Note that the layout of the phones may vary slightly by make and model.
